Program Overview & Objectives

Designed to prepare students to succeed in roles that use Enterprise System (ES) Technology to manage, integrate and expand business endeavours.

This post-graduate program gives students the opportunity to gain a deep understanding of relevant topics and technology pertaining to ES (like ERP, SCM, and CRM), BPR, Big Data, Business Analytics, Cloud Computing, IS Security, Project Management and IT strategy, using some cutting edge technologies from leading vendors like SAP, IBM, SAS and Teradata. Students will participate in ERP simulation games which teach ERP concepts “by doing”.

This program provides students with an opportunity to gain up to date knowledge and skills to analyse, implement and use ES. It further enhances the student ability to comprehend how and why these systems provide economic, technological, operational and strategic value to an adopting organisation. It unleashes the strategies to manage ES implementation in order to achieve the anticipated benefits.

To provide hands on experience with ES, courses in this program are embedded with software’s from leading ES vendors like SAP. Students not only develop skills in learning SAP but also gain the opportunity to prepare for SAP certifications related to business processes, business intelligence and HANA. By doing this, students will have a competitive advantage in the job market.

Master of Technology (ES & BA) is accredited by Australian Computer Society (ACS) as professional level courses. The ACS has reciprocal arrangements with many international computer societies and student qualification will be recognised around the world.

Professional Recognition

Master of Technology (Enterprise System) is recognised by the Australian Computer Society.

Career Opportunities

Our graduates find employment in:

• ERP systems operation
• ERP project management
• Functional analysis
• ERP Data Analyst
• ERP Business Analyst
