

## COURSE DESCRIPTION:

This is a general qualification for the integrated management of logistics. Achievement of this qualification will require the self-directed application of knowledge and skills, with substantial depth in some areas where judgement is required in planning and selecting appropriate equipment, services and techniques for self and others.

Applications involve participation in the development of strategic initiatives as well as personal responsibility and autonomy in performing complex technical operations or organising others. It may include participation in teams, including those concerned with planning and evaluation functions. Group or team coordination may be involved.

## COURSE SUMMARY

## BLENDED DELIVERY

Blended delivery (workshops + self-directed online learning)

This delivery mode includes 8 x 2-day workshops covering key theoretical concepts and practical elements using small group and individual learning activities. Workshops are delivered at appropriate intervals as agreed. Each workshop is followed by a period in which the student undertakes self-directed learning including work on the completion of learning activities and preparation of assessment tasks. Workshop details are covered in the study plan.

Supported by  
**Government of  
South Australia**

IIBIT is a Recognised Training Organisation (RTO number: 6538) and issues nationally recognised qualifications and statements of attainment
